## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 24-July-2007 has been entered.
2. The amendment filed on 24-July-2007 has been received and entered. Claims 13-23 are pending.
3. Applicant's Amendment has overcome the previous rejections under 112.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2165

5. Claims 13-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Eyal (US 2003/0018799 A1) previously presented.

As per claims 13, 18 and 21 Eyal is directed to a controlling method, device and instructions of a content obtaining device for obtaining (wherein "for" is interpreted to be intended use and should be replaced with "to") a content data from a content providing device, the controlling method of the content obtaining device comprising the steps of:

generating a search information in accordance with the content data from the content providing device and types of the content data in the content obtaining device (paragraph 0023, lines 3-5, paragraph 0030);

searching for a new content information in accordance with the search information (paragraph 0025, second column, lines 1-3); and

displaying the new content information in accordance with a result of the searching (paragraph 0025, second column, lines 11-12).

As per claims 14, 19 and 21 Eyal is directed to wherein the content data includes at least one of music title and artist name (paragraph 0024, lines 3-6).

As per claims 15, 20 and 22 Eyal is directed to wherein the types of content information includes at least one of a genre name, music title, and artist name (paragraph 0024, lines 3-6).

As per claim 16 Eyal is directed to further comprising the step of reading out the new content information (paragraph 0026, lines 1-2).

As per claim 17 Eyal is directed to further comprising the step of reproducing the new content information (paragraph 0025, second column, lines 12-16).

### ***Response to Arguments***

6. As per applicants' argument that Eyal does not teach the method of generating search information is not considered persuasive.

The Eyal reference teaches searching a client terminal connected to internet (paragraph 0022, lines 1-2). The search information is either generated by the user-query or by user actions (paragraph 0030, lines 1-3). Eyal teaches a media player that would be obtaining the content from the provider and playback the media associated with type of data it can recognize. Therefore the Eyal reference does teach generating information with respect to media content on the internet along with data types that the obtaining device can recognize.

### ***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tomasz Ponikiewski whose telephone number is (571) 272-1721. The examiner can normally be reached on 9:00-5:30.
